Available for free on Appstore and Google Play

It's easy

01 After entering of the
three primary circuit
and height...

...the correct size is
displayed automatically.

02

By using swipe'a you can change
the view of the feminine version.

You can select metric and
imperial system.

SANTI Sizer App is a dedicated tool for SANTI dealers and customers, who want to easily and quickly verify the body measurements with SANTI standard product sizes.

The SANTI Sizer App allows for better and faster size choice of SANTI drysuits and undersuits. By scrolling and choosing your own body measurements (available in cm or inches) you will be able to see which SANTI size is the best for you to try on and place an order. It also helps to choose the best demo gear size.

The SANTI Sizer App verifies your body measurements with the ones from SANTI standard size chart and suggests the closest one you should try. When you see a note that there was no match to the measurement, it means that you might seek made to measure option. It is always the best to contact your nearest dealer for advice.

Please note, that the suggested size is basing on statistical body measurements and test trials on statistical group of clients. SANTI does not take the responsibility for the final, actual fit of the real product.
